

ULINK Test Reporter

Automatic Test Reporting Service

ULINK Test Reporter is a web-based software service designed to manage all ULINK DriveMaster test results. All test results are stored in the cloud. Users can automatically upload test results to secured cloud storage and build a private test database. Based on selected criteria, Test Reporter automatically presents the results on a web browser in various useful formats.

ULINK Test Reporter complies with US data protection requirements and the EU General Data Protection Regulation (GDPR). All user information and test data are protected under the Data Privacy Act.

Main Features:

- Collect thousands of test results in a database
- Compare test results in the database with simple on-screen queries
- Support all ULINK Test Suites' test results
- Support additional user-defined test suite csv and log files
- Display and compare test results with information such as *pass, fail, not tested*
- Apply various filters such as date range to narrow down the comparison
- Generate Templates for test suites and test suite versions for result parsing
- List users, devices, test results, and test suites views for inspection
