When:
${Event.eventDateTime}
${Event.addToCalendarLink}

Our **OPAL Testing Tutorial Workshop** held in July was a complete **SELLOUT!** We had to close registration one week before the scheduled deadline.

So if you would like to know more about OPAL technology and testing, you still have one FINAL chance. Sign up today for our **OPAL Testing Tutorial Workshop to be held on September 11 and 12, 2012**. The workshop will present the OPAL architecture and definition. In addition the workshop will provide a tutorial of hands-on experience in exploring and testing of the OPAL devices using ULINK DriveMaster software. The environment includes a setup of PC workstation and DriveMaster software to allow attendees to explore the OPAL information in the class.

This is a 2-day workshop held on consecutive days from 1pm to 4pm (PST). Each day includes a 2 hour lecture and a 1 hour practice.

Each registrant is eligible to receive a **FREE Testing Service** in confidence of TCG Storage OPAL test cases v1.0 for one device. *(This Testing Service is regularly priced at $2,000)*

The fee per attendee is **$899**. Register **by August 14, 2012** to be eligible for a **$100 discount.**

For effective learning, the class size is kept small. As

mentioned earlier, **our July workshop was a complete SELLOUT that we had to close registration one week before the scheduled deadline.** **So please register early.**

To register, please go to www.ulinktech.com
