ULINK PCIe-SSD Power Adapter Plus Gen4 (PSPA+ Gen4)

ULINK PCIe-SSD Power Adapter Plus Gen4 (PSPA+ Gen4) has been completely redesigned to support PCIe Gen-4. It allows users to control the power supply to the Device Under Test (DUT) without turning off the system power.

The adapter offers the following:

General features:

- PCIe x4 or PCIe x16 configuration
- Support for all PCIe voltages: 12v, 3.3v & 3.3v Aux
- Isolation of data and auxiliary signals from the PCIe system bus
- Protection of the PCIe power supply through easy-to-replace pluggable fuses
- PCIe wear-out riser card for high volume testing
- LED lights to show board status

Advanced features:

- Two ways to control device power - hardware switch and software control
- The ability to supply the DUT with power from either an internal or external power mode
- The ability to supply the DUT with up to 5 Amps
- Current and voltage measurement
- Voltage adjustment via external power mode
- Support for PCIe PERST# (PCIe Reset)

This long awaited Gen4 adapter is now available for sale. Please contact sales@ulinktech.com for details.

DriveMaster 8 Revision - V8.1.1500

Support PCIe Gen-4 along with ULINK PSPA+ Gen-4 board

DriveMaster critical security updates

Enhancements and bug fixes to Replay Protected Memory

Block

Further identification to Security Protocols, e.g. TCG, RPMB, IEEE1667 and etc.

TCG Command Control Panel updates:

- *Support the large number of rows in the table and the large number of entries in the column*
- *Enhancements and bug fixes to K_AES_128/256, Locking, AccessControl table and Random method*
