

DA Drive Analyzer

AI Based Disk Drive
Failure Prediction Service

Powered by ULINK

ULINK Has a New Trick up its Sleeve, and it's Called DA Drive Analyzer

Dear {First Name},

You may know ULINK as a drive testing company with a proud history of providing unbiased third-party testing of hard drives and solid-state drives.

We wanted you to be among the first to know that we do AI predictive drive maintenance now too.

By applying artificial intelligence, we have launched DA Drive Analyzer. This service will not only warn you when your drives are close to failure, but it will also let you explore your drives' symptoms in detail in case you want to get technical. Artificial intelligence, human intelligence, or both - it's your choice.

Right now, the service is **available to QNAP NAS owners**, but stay tuned. We plan to bring this drive failure prediction service to Windows PC users and others soon.

Drive Analyzer

Do you have a QNAP NAS and want to try the service for FREE until March 5, 2022. Check out DA Drive Analyzer over at QNAP. Multiple ways to keep tabs on your drives:

- [In QTS, via the DA Drive Analyzer app for QTS](#)
- [Online, via DA Portal](#)
- [Via email notifications](#)
- [On Windows, via the DA Desktop Suite app](#)

Try now (QNAP software store)

Predict drive failures and prevent data loss!

For more information please visit our [Contact Page](#) or contact your [ULINK representative](#).
