ReActivate() method with empty ObjList and 'RangeStartLengthPolicy'=1; Response - pass	PASS
ReActivate() w/ emptyObj and RSLP=1 effect: The session - Abort (no data returned)	PASS
ReActivate() w/ emptyObj and RSLP=1 effect: The LifeCycleState of the LockingSP remains the same	PASS
ReActivate() w/ emptyObj and RSLP=1 effect: The value of 'C_PIN_Admin1.PIN' remains at their current values	PASS
ReActivate() w/ emptyObj and RSLP=1 effect: RangeStart and RangeLength remain at their current values	PASS
ReActivate() w/ emptyObj and RSLP=1 effect: The media encryption keys remain at their current values	PASS
Verify 'SingleUserModeRanges'=empty and 'RangeStartLengthPolicy'=1 from the LockingInfo table	PASS
Verify 'Policy'=1; 'All'=0; 'Any'=0 from Level0_Discovery	PASS
ReActivate() method with SingleUserMode for Range1 and Ragne2; Response - Pass	PASS
ReActivate() w/ Range1/2 effect: The session - Abort (no data returned)	PASS
ReActivate() w/ Range1/2 and RSLP=0 effect: The LifeCycleState of the LockingSP remains the same	PASS
ReActivate() w/ Range1/2 and RSLP=0 effect: The value of 'C_PIN_Admin1.PIN' remains at their current values	PASS
ReActivate() w/ Range1/2 and RSLP=0 effect: RangeStart and RangeLength remain at their current values	PASS

ReActivate() w/ Range1/2 and RSLP=0 effect: The media encryption keys remain at their current values	PASS
Verify 'SingleUserModeRanges' and 'RangeStartLengthPolicy' from the LockingInfo table	PASS
Verify 'Policy'=0; 'All'=0; 'Any'=1 from Level0_Discovery	PASS
ReActivate() method with entire Locking table and 'RangeStartLengthPolicy'=0; Response - Pass	PASS
ReActivate w/ entireLocking: The session - Abort (no data returned)	PASS
ReActivate w/ entireLocking: The LifeCycleState of the LockingSP remains the same	PASS
ReActivate w/ entireLocking: The value of 'C_PIN_Admin1.PIN' remains at their current values	PASS
ReActivate w/ entireLocking: The media encryption keys remain at their current values	PASS
ReActivate w/ entireLocking: Verify 'SingleUserModeRanges'=EntireLocking and 'RangeStartLengthPolicy'=0 from the LockingInfo table	PASS
ReActivate w/ entireLocking: Verify 'Policy'=0; 'All'=1; 'Any'=1 from Level0_Discovery	PASS
ReActivate w/ entireLocking: Range1-GlobalRange.Set Request in LockingSP as User1-(N+1); Response - StatusCode = 01h(Not_Authorized)	PASS
ReActivate w/ entireLocking: GlobalRange-RangeN.Set Request in LockingSP as User1-(N+1); Response - Pass	PASS
ReActivate() method with all Locking Objects and 'RangeStartLengthPolicy'=0; Response - Pass	PASS
ReActivate w/ allLockingObj: The session - Abort (no data returned)	PASS
ReActivate w/ allLockingObj: The LifeCycleState of the LockingSP remains the same	PASS
ReActivate w/ allLockingObj: The value of 'C_PIN_Admin1.PIN' remains at their current values	PASS
ReActivate w/ allLockingObj: The media encryption keys remain at their current values	PASS
ReActivate w/ allLockingObj: Verify 'SingleUserModeRanges'=all objects and 'RangeStartLengthPolicy'=0 from the LockingInfo table	PASS
ReActivate w/ allLockingObj: Verify 'Policy'=0; 'All'=1; 'Any'=1 from Level0_Discovery	PASS
ReActivate w/ allLockingObj: Range1-GlobalRange.Set Request in LockingSP as User1-(N+1); Response - StatusCode = 01h(Not_Authorized)	PASS
ReActivate w/ allLockingObj: GlobalRange-RangeN.Set Request in LockingSP as User1-(N+1); Response - Pass	PASS
Set a new PIN to userX Request; Response - Pass	PASS
Erase() effect: Locking_Range(X-1).Erase Request; Response - Pass	PASS
Erase() effect: Read/WriteLockEnabled and Read/WriteLocked = 0	PASS
Erase() effect: RangeStart and RangeLength are not changed	PASS
Erase() effect: Generate a new media encryption key for LBA range	PASS
Erase(): C_PIN.UserX = empty	PASS
Erase(): Tries = 0 from the C_PIN table	PASS
Feature Set: Block SID Authentication	PASS
Check the support of BlockSID Authentication from Level0_Discovery	PASS
Block SID Authentication command: pass/abort(the command is supported/not supported)	PASS
Check SID Blocked State after Block SID Authentication command: SID Blocked State = 1	PASS
Start Session as SID after successful execution of Block SID Authentication command: statusCode=01h	PASS
Authenticate - SID (authority UID); Authenticate Response - StatusCode/AuthStatus=00h/00h(SUCCESS/False)	PASS
The Tries column of the SID C_PIN shall not be incremented after Block SID Authentication command	PASS
Clear Events: Revert AdminSP	PASS
Check SID Blocked State(=0) after Revert	PASS
Clear Events: Power Cycle	PASS
Check SID Blocked State(=0) after power cycle	PASS
Block SID Authentication command with Hardware Reset bit=1: Pass	PASS

Check SID Blocked State(=0) after Hardware Reset	PASS	
Block SID Authentication command with Hardware Reset(PERST#) bit=1: Pass	PASS	
Check SID Blocked State(=0) after Hardware Reset(PERST#)	PASS	
Subsequent invocation of Block SID Authentication command: Fail with 'Other Invalid Command Parameter'	PASS	
Check Locking SP Freeze Lock State/Supported bit from Level0_Discovery	PASS	
Verify Locking SP Freeze Lock State bit and 'Frozen' value in the SP table	PASS	
Verify SID State Value(=1) if SID C_PIN credential is NOT the same as the value of the MSID C_PIN credential	PASS	
Verify SID State Value(=0) if SID C_PIN credential is the same as the value of the MSID C_PIN credential	PASS	
Revert LockingSP	PASS	
Start Session with HostChallenge - AdminSP	PASS	
Sync Session - AdminSP	PASS	
LockingSP.Revert - Request	PASS	
LockingSP.Revert - Response	PASS	
End Session - Request	PASS	
End Session - Response	PASS
